

EMack Ryder Cart

Helping you achieve outstanding results with less time and energy!!

Quality. Always.

The Emack Ryder Cart combines modern materials and fabrication techniques with the care and hand-built craftsmanship of yesterday.

Engineered To Be Better.

Every system, moving part, component, and function have been rigorously field tested. Continuous improvement means that as technologies improve, so do we.

Precision Machining.

Waterjet cut and fixture-welded body components, precision castings, and hand fit assembly insure a quality industrial strength machine that will stand the test of time.

Speed & Power.

Capable of handling up to three 12" drum sanders, and traveling at up to 4mph, the Emack Ryder revolutionizes the way crews sand gym floors.

Powder Coat Finish.

The chassis is powdercoated inside and out to ensure durability, long life, and corrosion resistance.

Optional Propulsion Power.

Premium 2hp 240v single or 480v three phase for North America delivers 400lbs of pulling capacity. Optional 50hz 230v single phase for Europe, Asia, and Australia.

Polarity Switch.

Change incoming electrical polarity to the motor with the flip of a switch. This eliminates the hazard of rewiring or reconnecting the power source.

Hydraulic Transmission.

Infinite forward and reverse with sacrificial coupling, provides reliable, predictable power and protects expensive drivetrain components.

Cast Urethane & Aluminum Wheels.

Strong, non-marking urethane protects expensive floors. Lock-out rear hubs for ease of loading and unloading. Precision casters up front ensure smooth operation.

Sander Hookup Systems.

Standard system kits available for the most common Gym Floor Sander models and manufacturers. Custom kits are available upon request.

Integrated Accessories.

Standard 110v plug with USB ports for accessory power on all 230/240v models. Cushioned, adjustable captain's chair with armrests.

Customizable.

- Do you desire your logo or custom colored powder coating?
- High back seating or cupholders?
- Need to integrate dust collection?

Emack can engineer solutions to any unique challenge or situation your company may have.
